

Ablation Zone looking north towards Clone

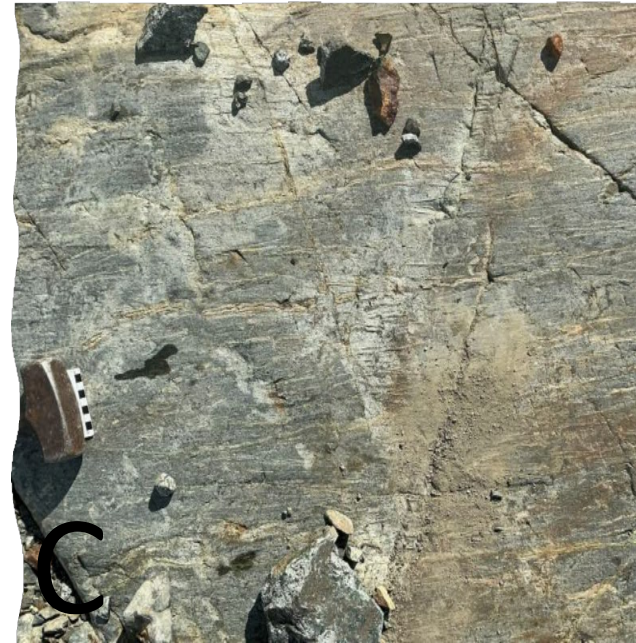

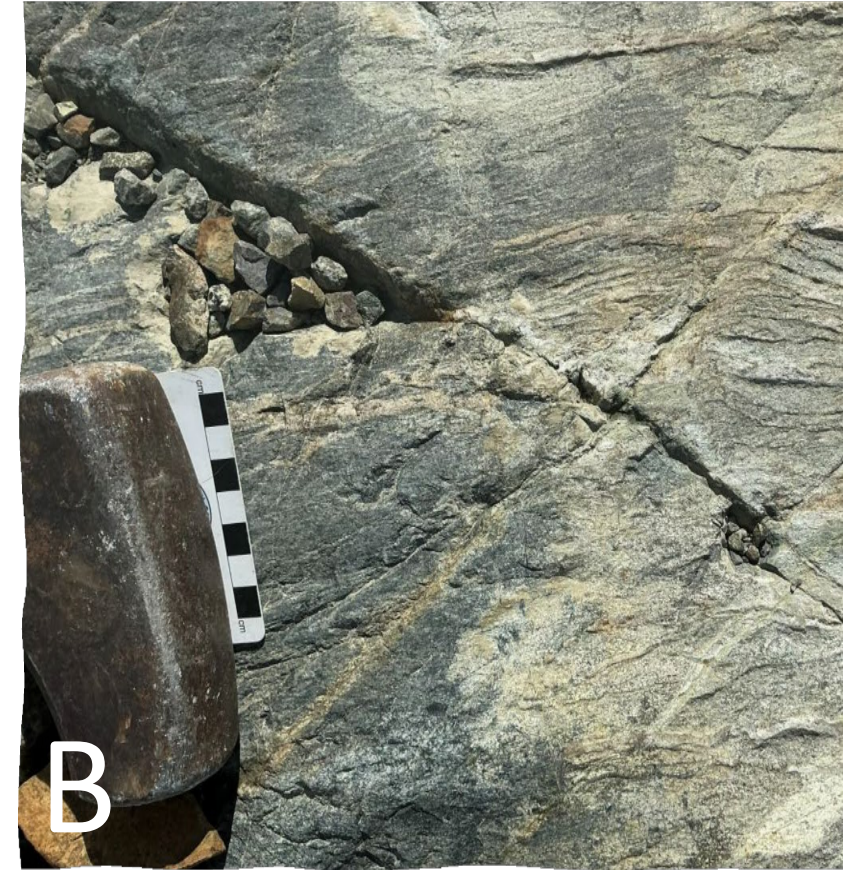

Seagull Showing

Seagull Showing

- Sheeted sugary quartz veins with magnetite-pyrite centrelines cutting dark green-grey-brown fine grained chlorite-biotite-magnetite altered diorite. Late quartz epidote veins cut everything. Sheeted veins strike 281/52.
- Sheeted veins show some ductile deformation in B and are fragmented and dismembered in C & D

Seagull Showing

Sheeted sugary quartz veins with magnetite-pyrite centerlines cutting dark green-grey-brown fine grained chlorite-biotite-magnetite altered diorite. Late quartz epidote veins cut everything.

Seagull Showing

Quartz-pyrite-epidote-chlorite veins 1-8 cm wide cutting hornblende-biotite porphyry granodiorite. Coarse grained with elongated hornblende laths and cut by hornblende quartz-epidote-pyrite veins and stockwork up to 15% volume.
